## SUMMARY

I am a driven and collaborative professional with over 11 years of diverse experience in web design, hardware and software solutions, software development, and B2B marketing. I have honed my skills and expertise through various roles and responsibilities, spanning multiple industries and functions. With a Bachelor's Degree in Information Technology, I possess a strong technical foundation and a keen understanding of digital technologies. I thrive in fast-paced environments, working collaboratively with cross-functional teams to deliver exceptional results. I am passionate about taking on new challenges and continuously expanding my skillset, leveraging my experience and expertise to drive innovation and business success.

## WORK EXPERIENCE

### Front End Engineer – Lendlease, Sydney

May 2019 – Present

Worked on an automated digital platform SaaS that streamlines the architectural design, financial analysis, and workflow process in the construction industry.

- Developed and maintained high-quality front-end code using React, TypeScript, and Storybook, following best practices and coding standards to ensure optimal performance and scalability.
- Collaborated with cross-functional teams of designers, developers, and project managers to gather requirements, design solutions, and deliver products that met customer needs and exceeded expectations.
- Participated in code reviews and provided constructive feedback to team members, promoting a culture of quality and continuous improvement.
- Contributed to the development and maintenance of front-end libraries, style guides, and design systems, ensuring consistency and coherence across products and teams.
- Built responsive and accessible user interfaces that provided an optimal user experience on a range of devices and platforms.
- Stayed up-to-date with emerging trends and technologies in front-end development, and proactively shared this knowledge with the team to foster innovation and growth.

## Projects

### Crypto

A react JS based using the API from Coin Gecko using Chakra UI

Demo: <https://farwasyed.github.io/>

Github: <https://github.com/farwasyed/cryptocoinjs>

### Hangman

A react typescript game using material UI component.

Demo: <https://farwasyed.github.io/>

Github: <https://github.com/farwasyed/cryptocoinjs>

### Foods to Forks

A recipe finder built in React using API from food2fork.com.

Demo: <https://farwasyed.github.io/foods2forks/#/>

Github: <https://github.com/farwasyed/foods2forks>

### Tic-Tac-Toe

Classic two player TicTacToe, built with Javascript, HTML5 and CSS3.

Demo: [farwasyed.github.io/project0/](https://farwasyed.github.io/project0/)

Github: [github.com/farwasyed/project0](https://github.com/farwasyed/project0)
